

## The Wrong Decision Addendum 13

This is gonna be hard because you're going to have to read and absorb a lot of information for this one. That said, it is the most important vote yet and I'll be damned if we don't deserve a few minutes of your time. So, pay attention.

***Forewarning: You should be reading this with a smile because that's how I'm writing it.***

First reaction of anyone, no matter how it's communicated, is going to be: 'they're giving up' and every other iteration of the same thought. This is not that.

In my recent Medium release, I begged for more engagement from the holders. I believe I used "Community, Takeover" as a header and that is a very important comma in there. For the most part, that didn't happen. This isn't a "the community let us down" post. It's what happened. I would say that maybe 7 people even took the time to read it and some of those 7 couldn't leave a comment.

I am of the opinion that The Wrong Biosphere as it sits has gone as far as it can go. Everyone has been told about it. It's been called and shilled across all of cryptoland. Although it is up quite a bit still (like 700 fucking x) from the early days, it will slowly fall until everyone that sticks with it loses. We are all exit liquidity for people as they lose their faith.

We can't have that. So, WTF can we do?

The last phase of the roadmap is what? C'mon, I know you know it. Correct! "Moon like crazy" is what's left. How do we achieve that with a stagnant community? We gotta get a little unconventional. Yes, here we go again.

***Please focus and absorb.***

In a nutshell (oh boy is that ever a pun), Wrong and WrongETH are going away.

Squirrel \$WIFNUTS started as a bit of an experiment. Our goal was to hand it off to the community to see their power. There's challenges to that.

- Us letting go.
- Watching them get frustrated and feeling that they weren't being heard by each other.
- The slowdown due to feeling like it isn't working.
- A lack of focus.

The experiment is over. We aren't going to sit here and watch this Squirrel fade away too.

Switching gears, for the past several months, most of the buys in the Wrong charts have been JoJo and me. We were hoping that the Squirrel hype would bleed over to the Wrong Biosphere. You can all see that this plan didn't work. So, what now?

Here I go being honest again...Wrong is the best and most comprehensive project I've ever seen. Wildly proud of what we built. It's run its course and we can't be wrong about that anymore.

*"Legit projects work way too hard and get nowhere."*

WTF are you telling us Jay? I'm getting there. I'm not saying anything you don't already know. We have an opportunity to 1000x again and it's on Solana, WifNuts. The conundrum is how to get Wrong investors from here to there willingly.

I cannot do anything scammy. I cannot lie about anything. We cannot lose our integrity and be crypto corrupt. We cannot fuck over a single person. People *can* be mad, I don't control that. We control what we can control.

So...

Do we all sit back and diamond-hand while people slowly bleed us out? Because that's what is happening and we cannot stop it.

We have a chance to rebuild this wif nuts. We can bring the wrong attitude and greatness all to one token. We can catch new eyes. We already are.

***I'm going really fast and taking a big chance here.***

I believe that the people remaining want to help us like we want to help you. This is how you do it. Bring your wrong investment over to Squirrel.

Here's what we can do for *you* in return for continuing to trust us.

We will keep trying to make you life-changing money. We can't do it with Wrong anymore. We think we can do it with Squirrel. It's never a guarantee.

There are about 200 holders (Wrong and WrongETH combined) that have more than \$20 worth of tokens. Of the 200, a large portion of the total tokens are held by the wrong team. Not a majority, but a large chunk. The rest belong to about 25 different people. Literally.

Please stay with us. Please come along. We can all make it. We wouldn't be fighting every day if we didn't believe it. But, we need to blow it up to rebuild it.

Half of the Coin Purse will be airdropped to qualifying whales that aren't me or JoJo. There are about 40 wallets. The other half of the Coin Purse will be sent evenly to eligible PP NFT holders that aren't me or JoJo. There are about 80 wallets. Most PP holders have made their money back many times over. Regardless, they get some.

If you start dumping before the exodus date and time, you disqualify yourself.

There was talk of only paying out to the people that come over to nuts in some capacity but that isn't really fair to you.

We'd suggest you sell responsibly and with the correct attitude. A handful of people have never sold a token. Many of you have flipped and profited more than you put in. Don't be dumping on the true wrongsters. Only take the money you think you earned. The \$1000 today was \$20 when you bought it and then consider what work you've done to help. If we've tried to teach you anything, it's to respect your fellow investor. We can do this the "wrong" way.

If there's any liquidity left, the team will sell after everyone has had their chance and we will use that money to buy and burn my nuts. I have written before that JoJo and I are riding the Wrong rocket to the moon or to the ground. Riding it to the ground means we sit back and wait for everyone to leave and turn out the lights. As expected, JoJo and I will not make a dime. When liquidity unlocks in 3-4 months, the people that acted Wrong will see some BNB appear in their wallet.

There will be minor changes to Wrong Solana but that isn't important right now. It's all for the good of the community and to make it more appealing to WIFNUTS investors.

The DAO will go away and be replaced with TG voting bots when needed. The DAO was an epic idea and execution that just gathers cobwebs. If you don't need it, then we don't need it.

**Is there a vote with this addendum or wtf?**

Yes. We are voting on whether or not you agree and if we should move forward with ending one thing to build another.

A "Let's get nutty" vote means you understand as much as you wish you didn't. Go forward with the plan to end Wrong and WrongETH and I'll think about coming to WIFNUTS.

A "I'm still wrong" vote means for me to STFU and not to change anything. Stay the way we are. If this wins the vote, we will do as you wish. We will need some direction though. So, a vote here means you'll contribute.

It would be cool if everyone did this the Wrong way. There are going to be some people that sell before the vote even starts. They were going to dump on us sooner or later anyway. There are things I absolutely hate about crypto.
